Building a Data Annotation Outsourcing Company | Scaling Teams for AI Companies | Physiotherapist turned Operator
Egypt

Summary

I am a physiotherapy student with a strong vision beyond traditional clinical practice—driven to build and innovate at the intersection of healthcare and technology. Through multiple internships and hands-on clinical experiences, I have developed a solid foundation in physiotherapy, particularly in musculoskeletal rehabilitation. However, my ambition extends further: I aim to solve real-world healthcare challenges by creating scalable, tech-driven solutions. As a beginner founder, I am actively exploring opportunities in the HealthTech space, working on projects, and continuously learning how to turn ideas into impactful ventures. I am passionate about:

- Healthcare innovation
- Startup building
- Problem-solving in patient care
- Bridging the gap between clinical practice and technology

I am currently looking to connect with:

- Investors
- Founders & entrepreneurs
- Developers & collaborators
- Healthcare professionals interested in innovation

Let's connect and build something meaningful.

Experience

The Address Investments

Property Advisor

April 2026 - Present (4 months)

Cairo

المستشفى البري طانى - British Hospital

Student Intern

March 2026 - Present (5 months)

New Cairo

Delivered physiotherapy support across a range of MSK and neurological cases in a structured clinical environment

Contributed to rehabilitation planning focused on optimizing patient outcomes and recovery efficiency

Gained exposure to high-standard clinical protocols and patient management systems

Observed opportunities for improving patient engagement and rehabilitation tracking, fueling interest in HealthTech solutions

Collaborated with healthcare professionals in a multidisciplinary setting to enhance care delivery

Strengthened clinical reasoning, communication, and problem-solving skills in real-world scenarios

Annotarors3

Co-Founder

March 2026 - Present (5 months)

online

Building a data annotation outsourcing company focused on delivering high-quality, scalable datasets for AI and machine learning teams.

Recruiting and training annotation teams to ensure accuracy and consistency

Developing workflows for data labeling (image, text, and video)

Implementing quality control systems to maintain high annotation standards

Managing operations and optimizing processes for scalability

Supporting AI startups with reliable and cost-effective data solutions

Focused on bridging the gap between human intelligence and machine learning by providing structured, high-quality data.

Fizik Center

Intern

December 2025 - January 2026 (2 months)

New Cairo

Assisted in the assessment and rehabilitation of patients with musculoskeletal and sports-related injuries

Applied therapeutic exercises and basic manual therapy techniques under supervision

Supported treatment plans focused on pain reduction, mobility improvement, and functional recovery

Gained practical experience in patient handling, exercise prescription, and rehabilitation progression

Educated patients on injury prevention and home exercise programs

Worked in a fast-paced clinical environment, enhancing adaptability and communication skills

THE BALANCE Rehab Clinic

Intern

April 2025 - May 2025 (2 months)

New Cairo

Contributed to rehabilitation programs targeting balance, posture, and functional movement optimization

Worked with patients presenting with MSK dysfunctions and movement impairments

Observed key challenges in patient adherence and long-term rehabilitation outcomes, reinforcing interest in scalable rehab solutions

Applied exercise therapy and movement-based interventions to improve stability and performance

Collaborated with clinicians to deliver patient-centered care in a structured outpatient environment

Strengthened clinical reasoning and ability to analyze movement dysfunctions in real-world scenarios

Veterans and War Victims Association

Student Intern

January 2025 - February 2025 (2 months)

Cairo

Assisted in the assessment and rehabilitation of patients with musculoskeletal and neurological conditions, particularly war-related injuries and chronic disabilities

Applied evidence-based physiotherapy techniques to improve mobility, functional independence, and quality of life

Supported individualized treatment plans focusing on pain management, strength, and recovery progression

Gained hands-on experience working with complex cases, including trauma and long-term physical impairments

Collaborated with a multidisciplinary team to ensure comprehensive patient care

Developed strong communication skills when dealing with sensitive humanitarian cases
